

Measuring instructions for the custom fitted sheet

Accurate measuring is very important as these sheets are custom made to fit individual sizes. When measuring the length and width the measurement includes only the top side as indicated in the drawing.

- Measure the full length of the mattress. Enter this amount on the line marked A.
- Measure the full width of the mattress. Enter this amount on the line marked B.
- Measure the height of the mattress. Include in this measurement any additional height provided by pillow-top coverings or any additional means added to the mattress to provide more height that will be covered by the sheet. Enter this amount on the line marked C.

Submit this form with the completed measurements with your order. Please state if the measurements given were in inches or centimeters.

On the order form, please list a phone number and/or email address where you can be contacted if there are any questions.

If you have any questions or concerns, please contact us at support@lklcreations.com or phone us at (260) 693-0604 and we will answer them to the best of our ability.
